-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Objections***

Claim 5 is objected to because of the following informalities: the word “rroviding” should read, “providing”. Appropriate correction is required.

Drawings

The drawings are objected to because the “ledge” along the first border or “raised surface” along a “support ledge”, is not clearly identified with reference numerals in the drawings or specification. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the

Art Unit: 3635

changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4-8, and 10-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Gank ('684). Gank provides a support rail 21, first and second borders 23 that are at a right angle to one another, the first and second ends of the borders are connected by way of connector 24 and corresponding connector 25, there is a fascia 26 between the first and second border that is extended to a tapered line beyond the support rail, there is a ledge (at 29) along the first border that is lower than the border, the first connector is compatible with a cross-tie, the first connector comprises a right-angle connector of a first type, the second connector comprises a second right-angle connector of a second type that

Art Unit: 3635

is complimentary to the first type, and the border is a raised surface along the support rail.

Claims 1-3, and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Koch (DE 4113195). Koch provides (in Figure 1) a support rail 29, first and second borders (near 38) that are substantially orthogonal to each other, a cross tie 11 that is connecting the first end of the first border to the first end of the second border, and a ledge that has a raised surface 31.
